Chief Technology Officer

Kelvene Requiros
National Sales Manager

ISMS D24 Davao is a cutting-edge records management solution ideal for Philippine private schools. It highlights customizable features tailored to the school's unique requirements.

The system provides comprehensive coverage of both Basic Education (K-12) and Higher Education, offering various applications integrated into a unified workspace.

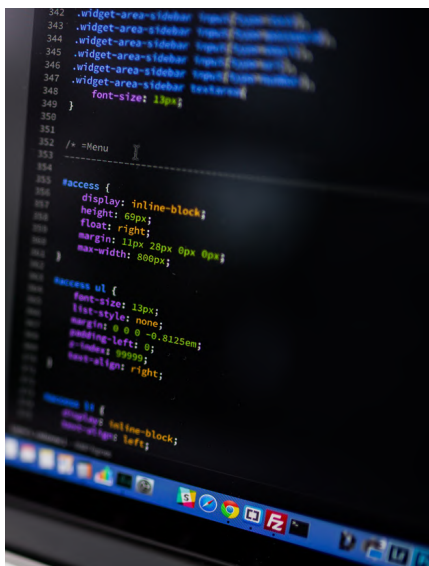

A changing education business landscape

To stay relevant in a digital era where the business landscape is constantly changing, a school must transform by adopting necessary technologies. A school management system helps administrators gain data-driven insights to make better decisions, improve enrollment, save on costs, enhance experiences, and increase efficiency.

Reliable, efficient school management system

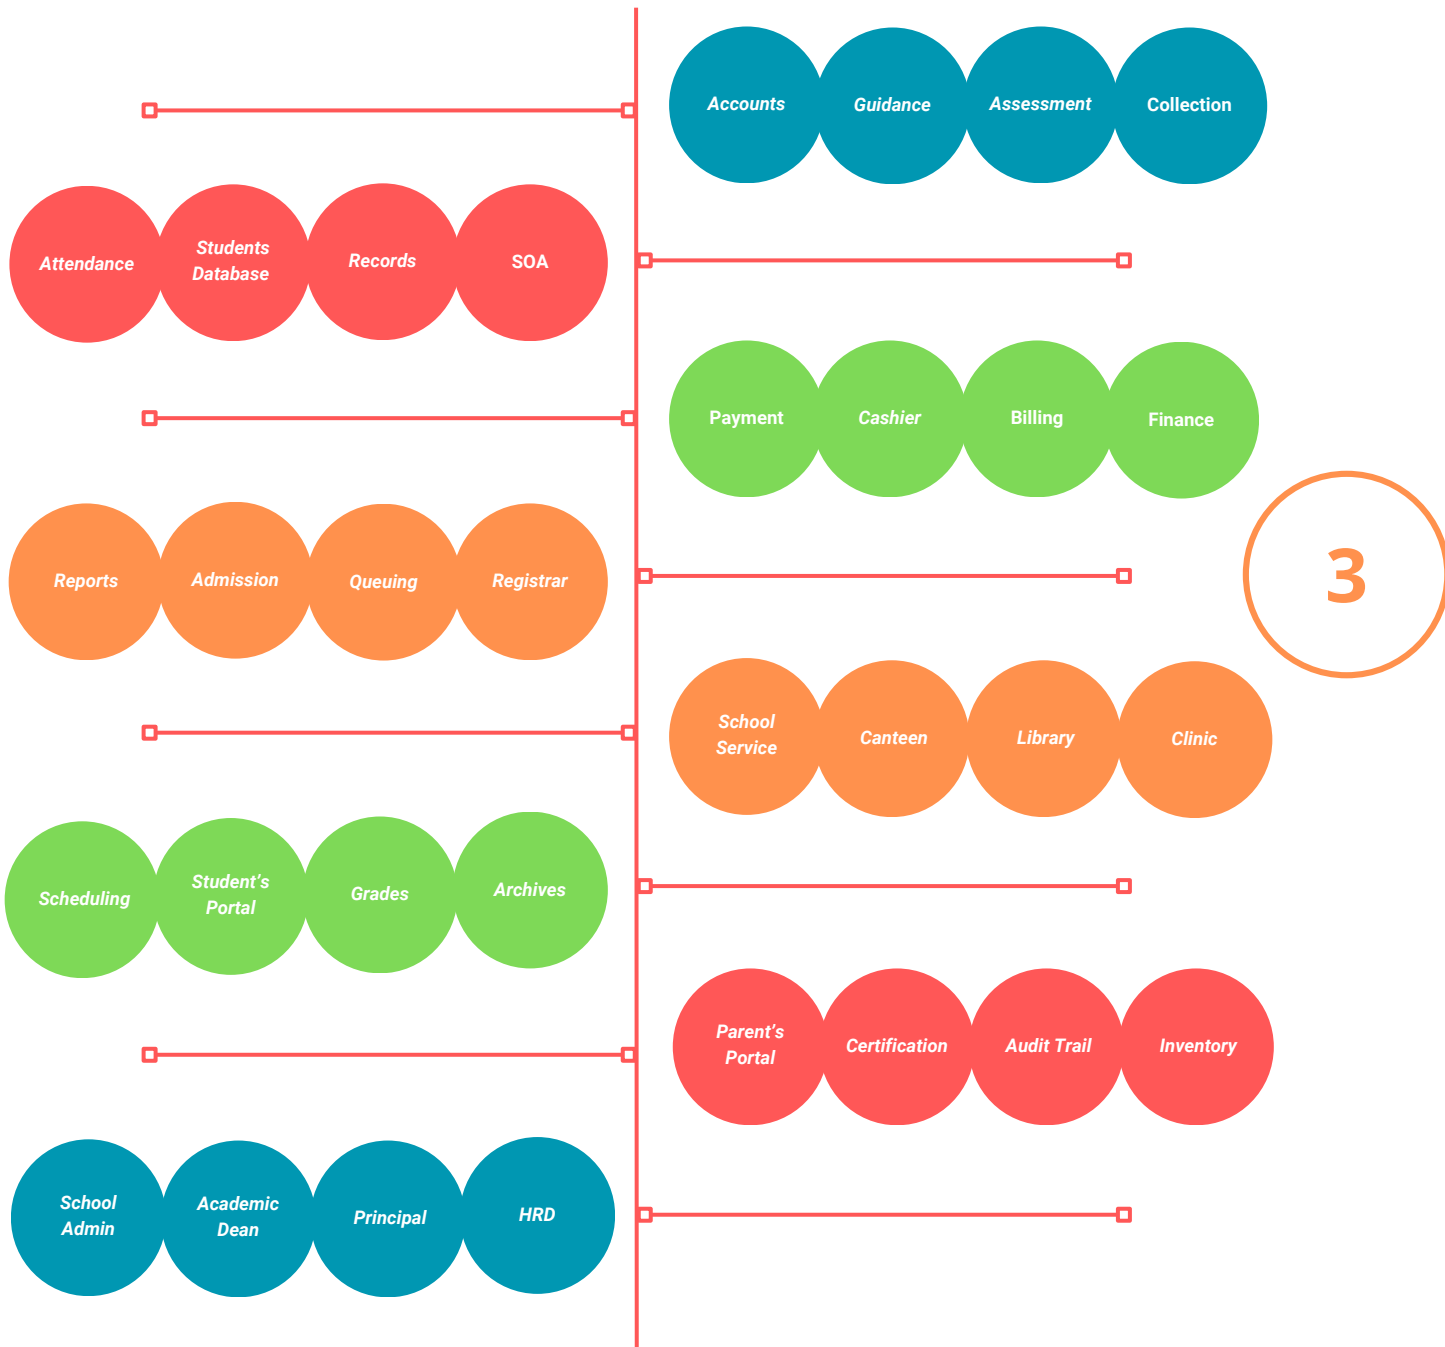

ISMS D24 Davao is an advanced network database offering a reliable and cost-efficient records management solution.

Schools can easily manage student records, enrollment data, and academic performance. The system streamlines administrative tasks such as payroll management, budgeting, and financial reporting. Its user-friendly interface allows for easy navigation and quick access to information.

With reduced workload, teachers and admin staff can focus on teaching and providing student support services.

Features

ISMS D24 Davao offers an array of features to simplify the work of the school administrator, faculty, and staff. With rapid application development (RAD) technology, the system is quick to deploy and highly customizable to address the school's specific needs.

Pricing

- **Basic Education (K-12): Php750/student** per year
- **Higher Education: Php500/student** per semester

Inclusions

- Online or onsite deployment and implementation;
- Online registration portal (hosted by ISMS);
- Continuous user training; and
- Remote support and consultancy.

System requirements

Hardware components

- **Dedicated server** - Intel Core i5 with 500GB storage capacity, 16GB memory, or higher specs. For schools with 1000+ students, we recommend an enterprise server.
- **Workstations** - At least, Intel Dual Core with 100GB storage capacity, 4GB memory or higher.

Software components

- Windows 7 OS or higher version
- MS Office 2007 or higher version
- MS SQL Server 2008 or higher version (if any, but not required)
- Firewall and antivirus (if any)
- Remote desktop

Network

- Server room (recommended, but not required)
- LAN-ready for an inter-office setup (DHCP or manual configuration)
- Database/IT administrator (recommended, but not required)

Our Company

A group of friends has been in software development for years, building systems for schools, cooperatives, and private and government offices. We registered MDM-ISMS in 2018 to focus on improving the country's private schools. Our commitment is to be the benchmark of school management technology in the Philippines.

In August 2023, we registered the company with the SEC under its new name, MDM Technologies. It will continue to sail on with the ISMS D Series as its flagship product together with ROSE online, Learn LMS, and robotics for education.
